# Flame Proof IIA / IIB Weight Limit Switch

#### Introduction

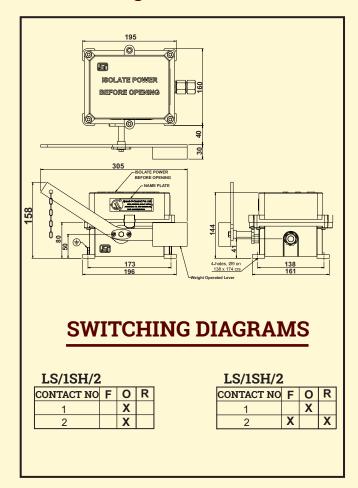

Flame-proof Counter Weight Operated Limit Switch is used to trip motor supply when the moving loads reach the extreme end positions of working zone. These are suitable for use in explosive gases, as specified Gas groups IIA and IIB, as per IS/IEC 60079-0-2017 & IS/IEC 60079-1-2014.

## **Operation**

A two (NC) Contact elements are operated by respective rotating cams, suitably adjusted on a square cam-shaft. When a cam on the moving load hits the weight of the limit switch and rotates the square cam shaft, which in turn operates the change over contacts.
