Successful CeMAT 2016, Hannover

Speed-O-Controls (SOC) successfully exhibited their products at CeMAT 2016, held in Hannover, Germany from 31st May 2016 -3rd June 2016.

We thank all our respected clients who visited us and spent their valuable time meeting us.

SOC Designs Customized Combi model RRC for HEG

Speed-O-Controls recently designed, developed and executed a special Analog Radio Remote Control for Process Crane running at Hindustan Electrode Graphite Limited, Mandideep, Bhopal.

This special system operated the process cranes functions such as the Long and Cross Travels as well as two Sling pipe functions and one suction pipe.

The analog outputs required in the system were provided through a dual axis joystick controller used in the Radio Remote Control System.

PRODUCT OF THE MONTH
